Computer Science Student · Cybersecurity

PROFILE

First-year Computer Science student specialising in Cybersecurity, interested in secure systems, AI/ML, and practical software development. Combines technical exploration with creative skills in design and video editing, and is motivated to develop products that solve real-world problems.

PROJECTS

SafeLab Sentinel — AI · Cybersecurity
Built an AI-powered lab safety prototype using Streamlit, FastAPI, Random Forest anomaly detection, HMAC integrity verification, risk scoring, and SQLite event logging. Simulates normal, hazardous, and cyberattack scenarios.

Carbon-Fibre Composite ML Research — Ongoing
Exploring tensile-strength prediction and explainable machine learning on 663 composite specimen records under faculty guidance, with publication as a goal.

Student Management & Academic Tracker — In development
Developing a student-focused application concept with student records, notes, calculator, to-do list, Pomodoro timer, marks tracker, and timetable.

EDUCATION

Vellore Institute of Technology (VIT), Vellore
B.Tech. Computer Science and Engineering — Cybersecurity specialisation
First-year undergraduate · 2026–present

TECHNICAL SKILLS

Python · Java (learning)
HTML · CSS · JavaScript (learning)
Streamlit · FastAPI
SQLite / SQL (learning)
Machine-learning fundamentals
Git & GitHub (project use)

AREAS OF INTEREST

Cybersecurity · AI & machine learning
Linux and systems · IoT & Operational Technology
Web development · Data-driven engineering

CREATIVE SKILLS

Graphic design · Video editing · Visual storytelling

CAREER DIRECTION

Build practical technical skills, contribute to research, explore freelance creative work, and eventually develop a technology startup.
